

Education	ETH Zurich, PhD · <i>Machine Learning</i> TU Wien, Dipl.-Ing. · <i>Computer Science</i>	Jul 2026 - present Sep 2019 - Mar 2025
Experience	ETH Zurich Doctoral Researcher · Currently working on sim-grounded learning, advised by Prof. M. Bambach. PythonPyTorchJAX	Zurich, Switzerland Jul 2026 - present
	University of Cambridge Research Assistant · Reimplemented MicroGPT on a custom vectorized JIT compiler with a user-scheduled frontend. · Hit 5.3x speedup over PyTorch and 14.4x over JAX via kernel fusion and autovectorization. · Prototyped an Apple GPU backend from reverse-engineered ISA notes. · Letter of Recommendation: sueszli.github.io/rec-cam.pdf PythonC++MLIRLLVM	Cambridge, UK Dec 2025 - May 2026
	Qube Research & Technologies Quantitative Analyst, Internship · Designed an ensemble of statistical volatility indicators per asset class. · Ported hot paths to zero-copy CPython extensions in Rust via PyO3 for 2.1x speedup. · Patched upstream FFI alignment faults at the Python/Rust boundary in Arrow's internals. · Built a differential fuzzing harness that validated the port against terabytes of numerical data. PythonRustApache Arrow	Paris, France Apr 2025 - Oct 2025
	ETH Zurich Research Assistant · Rebutted DeepMind's "self-ensembling robustness" paper via full reproduction and PGD attacks. · First-authored paper on a CAPTCHA-based Out-Of-Distribution eval suite for vision models. · Letter of Recommendation: sueszli.github.io/rec-eth.pdf PythonPyTorchJAX	Zurich, Switzerland Jul 2024 - Mar 2025
	University of Waterloo Research Assistant · Offered fast-tracked PhD directly from my Bachelor's. · Ran the first large-scale vector-DB benchmark for code retrieval, with queries synthesized via AST mutation. PythonPyTorchFAISS	Ontario, Canada Nov 2023 - Jun 2024
	Erste Asset Management Trading Software Engineer, Internship · Offered a permanent position. · Replaced per-message subprocess spawns with an in-process pipeline, cutting tick-to-signal latency. JavaTerraformFIX Protocol	Vienna, Austria Apr 2023 - Oct 2023
Publications	Jabary, Y. (2025). Rethinking Adversarial Examples (Master's Thesis, ETH Zurich). [code, pdf] Jabary, Y., Plesner, A., Kuzhagaliyev, T., & Wattenhofer, R. (2024). Seeing Through the Mask: Rethinking Adversarial Examples for CAPTCHAs. [news, code, pdf]	
Awards & Honors	MLIR Summer School, Full Scholarship Qube Research & Technologies / Raspberry Pi Foundation, Nominated Contest Judge Google for Developers, Nominated Community Chapter Leader EPFL, Summer Research Institute SuRI Fellowship University of Waterloo, Graduate Research Studentship GRS (\$23,081) University of Waterloo, Mathematics International Master's Award of Excellence M-IMAE (\$12,500) TU Wien, Institute of Logic & Computation Research Scholarship (€1,200) Austrian Government, National Maker Competition Prize (€3,000) University of Vienna, Early Admission Program in Mathematics for Gifted Students	2026 2025 2024 2024 2023 2023 2021 2018 2017
